The Brewing Crisis

SATURDAY, JULY 20, 2024BY: MARTIN ARMSTRONG

The failed assassination attempt on Donald Trump and his nomination, combined with the polls and our model, which every major entity looks at - Trust me. This lethal combination has given me concern that not just the American Neocons, which were probably behind the assassination attempt, but especially NATO may attempt at least a false flag in August/September. NATO will step up its rhetoric about how Russia is about to attack Europe because they fear Trump, who threatened to defund them. These people took their best shot to try to eliminate the greatest threat to their continued war agenda.

They control the press, and I can tell you that Putin has made many attempts at peace, and they are always rejected. They sent Boris Johnson to instruct Zelensky that he was NOT ALLOWED to accept any peace deal. They needed World War III for the plain reason that they knew the financial system was collapsing, and they would **NEVER** accept responsibility, fearing they would be dragged out and hanged by a revolutionary mob. This war is their only way out of this Marxist nightmare from their perspective. When communism fell in Russia, those in power were thrown out. They will not relinquish that power as the Russian Communists did. Moreover, the Communists staged a coup against Gorbachev, and what we have just seen is the attempt to assassinate Trump, which was the same type of power-driven event to retain power.

President Zelensky Suggests Ukraine May Pursue Nuclear Weapons To Counter Russia, Putin Responds

By Ryan Savendra · Feb 23, 2022 · DailyWire.com ·

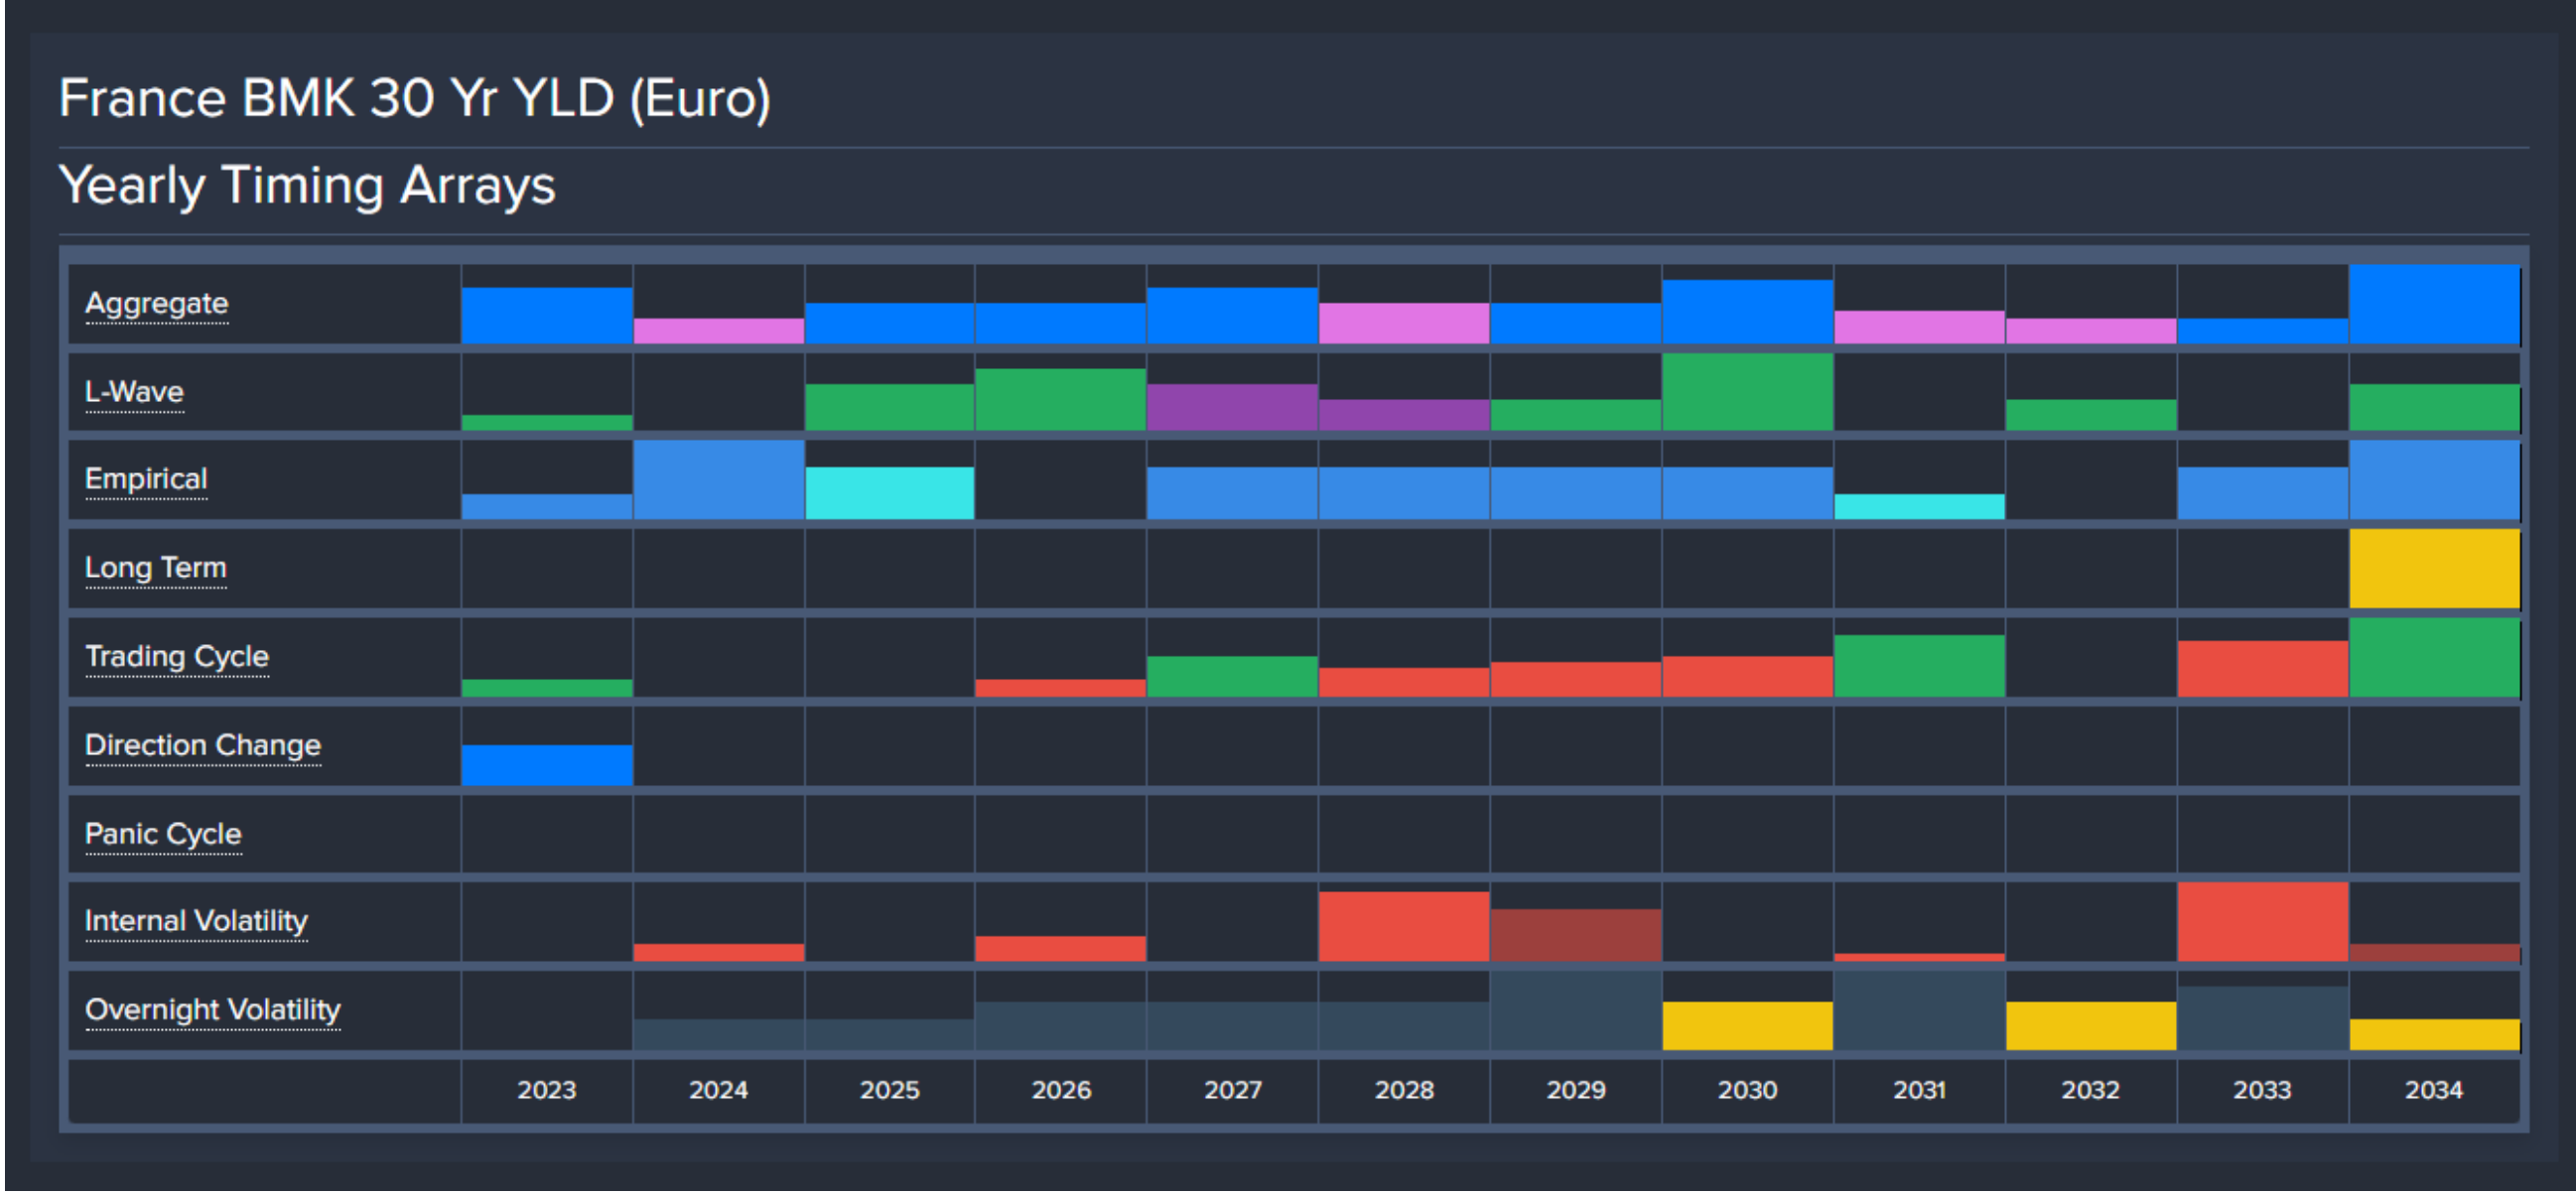

Ukrainian Presidency / Handout/Reuters/Agency via Getty Images

The Press MUST keep demonizing Putin and constantly put out the lie that Putin invaded "unprovoked" after they directed the interim government to start the civil war. To make sure Putin would invade, Zelensky stood up the day before and said that Ukraine would rearm with nuclear weapons targeting Russia. The Cuban Missile Crisis of 1962 was all about Russia putting nukes in Cuba 60 miles from the USA. They fear Trump, who is ant-war, and see this as their last chance to destroy Russia.

This entire affair centers on debt. It is part of the reason they want CBDCs to eliminate cash and, thus, the underground economy. They think that will increase tax revenues by 35%+. War is the great cleanser of debt. Governments get to reorganize and then default on the debt of the previous. Spain is a serial defaulter, as is France, which is in its 5th republic. With every change in government, they default on the debts of the previous. That is why they desperately needed this war rather than reorganize, which meant they would lose power and risk a revolution.

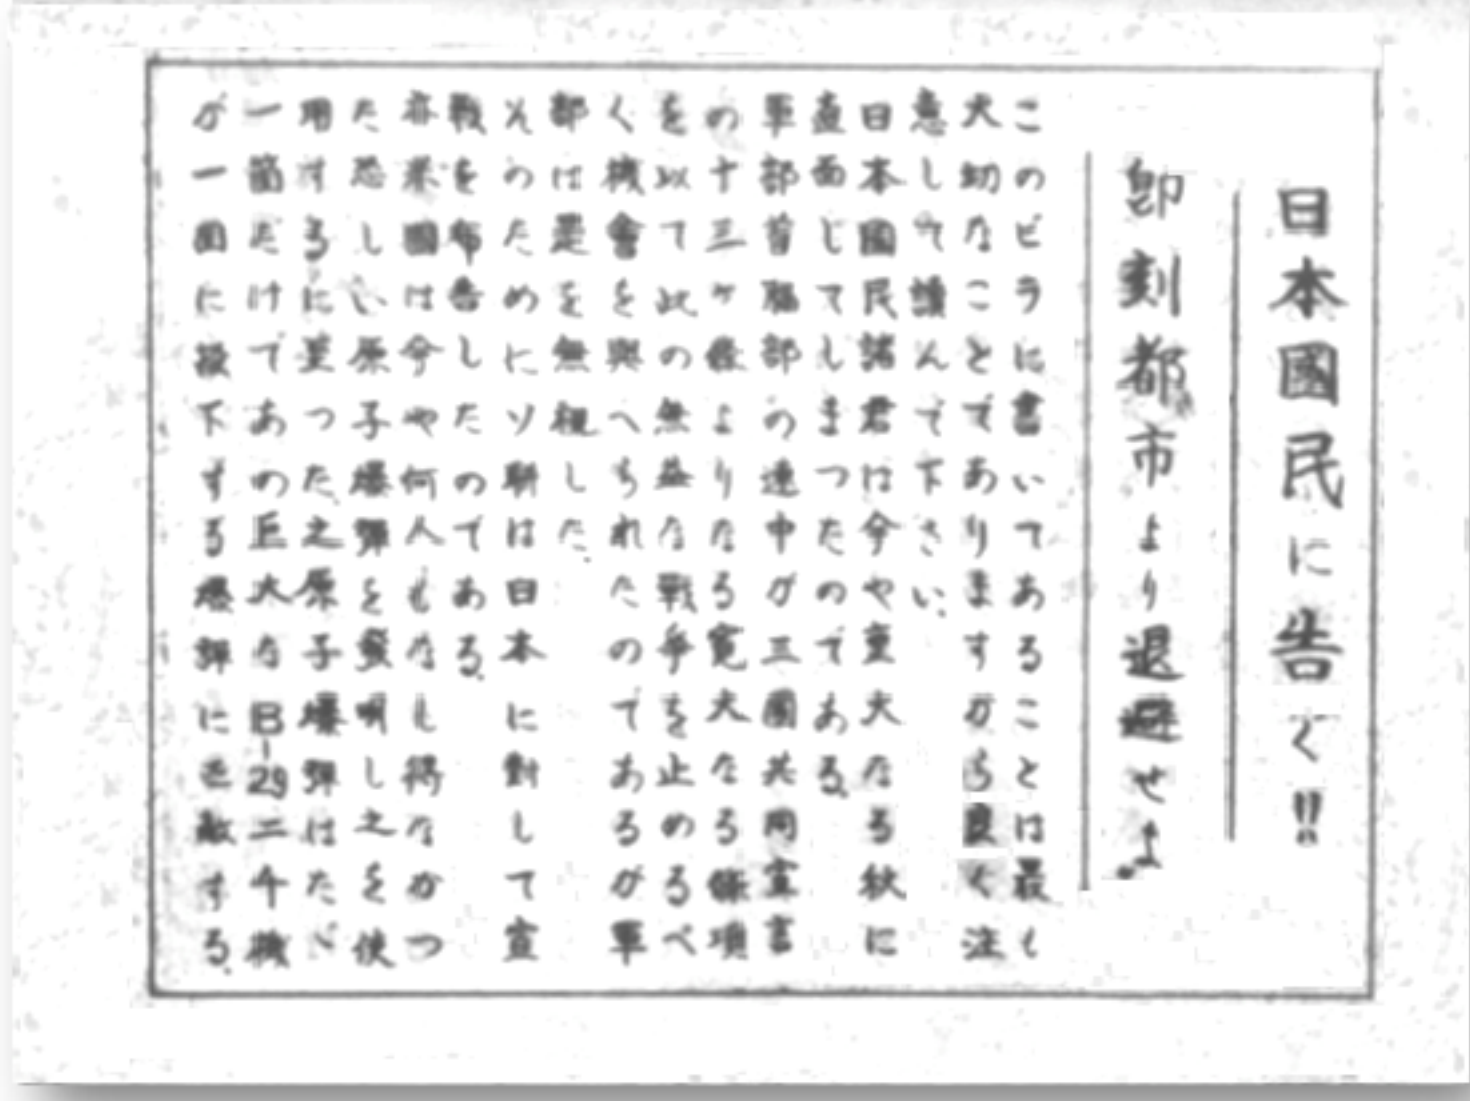

Unfortunately, we are looking at a significant change in government debt from 2024. Forecasting a single market is always vulnerable to error because the wildcard always comes from the outside. This is the advantage of Socrates, where we can look across a broad range of markets and see the shifts in trends globally. Here, you can see that we have a major turning point in 2024, not just in French debt but in Europe. We then have a 3-year trend into 2027, and I fear this will be war.

They need to stage something desperately. Former NATO Chief Lord Roberstons of Britain is coming out with the same BS - Russia will never use Nukes because the radiation might blow back on them, and he has openly come out and proclaimed we need to defeat Russia. This is a world war. He said the West should "take the gloves off" with Putin and Russia will never use nukes, so let's go and destroy Russia as if Putin will allow that, fall to his knees, and plead for his life.

The West is the aggressor here because they know the financial system is collapsing, and they have at least listened to me for all these years that **DEFAULT** and the collapse of empires that rely on debt come when they cannot sell the new debt to pay off the old. Interest rates **ALWAYS** rise in war. You must be insane to buy any long-term debt. They know a revolution is brewing, for they have generally required pension funds to be 70%+ in government debt throughout Europe. US Social Security is 100% government debt. They know a default means revolution. They need war desperately, and if they reduce the population by 50% - fantastic, for they will save the planet by reducing the vermin like us and escape from pensions.

My concern is that the rhetoric I have heard since the assassination of Trump failed is that they need plan B, fearing a Trump Victory. They need war ASAP and have stepped up the calls to destroy Russia. They are throwing the world at risk because they only care about themselves. If I were Putin, China, North Korea, and Iran, I would coordinate attacks simultaneously, and there is **NO WAY** the West will withstand this nonsense. These people are idiots and dangerous ones at that.

Leaflet dropped from a B-29 bomber warning of the bombing and destruction of Hiroshima and Nagasaki

I would start by nuking Kiev. Drop leaflets like the US did in Japan and give the people 24 hours to leave town. Ukrainians are fools. Nobody cares about them. This is only to destroy Russia. If the people of the West do not overthrow their warlords, then it is full-blown World War III.
